DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Shamoto et al. (6,690,322).

Regarding claim 1, 9, and 14-16, Shamoto discloses a wireless communication system comprising: a wireless mobile station (see fig.1, element 1 and its description); and a wireless base station coupled with the wireless mobile station through a wireless communication network, wherein the wireless base station transmits location information to the wireless mobile station in response to a request of the wireless mobile station (see fig.1, elements 5-8, col.1, lines 29-60 and its description).

Regarding claims 2, 10, Shamoto further discloses the wireless base station comprises a receiver for receiving a satellite signal from a satellite (see fig.1, elements 3, 6, and its description).

Regarding claim 3, Shamoto further discloses wherein the wireless base station analyzes the satellite signal in response to the request of the wireless mobile station, determines the location information and provides the determined location information to

the wireless mobile station (see fig.1, elements 3, 5-8, col.1, lines 29-60 and its description).

Regarding claims 5-8, 11-12 Shamoto further discloses the wireless base station comprises a memory for storing the location information (see fig.1, elements 5-6, col.1, lines 29-60 and its description).

Regarding claims 4 and 13, the Examiner takes Official notice that the signal transmitted and received between the wireless base station and the wireless mobile station satisfies IEEE 802.11 specification is notoriously well known in the art. in order to establish and manage communications between wireless base station and the wireless mobile station.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: "reading location information stored in the memory" It's not clear it reads location information from it memory and "transmitting the read location information itself"?
